Feather Template Diagram

This guide shows you where to place your feathers, and how many of each feather template to cut out. It also doubles as a handy dandy coloring page if you'd like to experiment with your own color combinations... simply print out as many times as you like and start fillin' in!

A cut 2 sets

C cut 1 set

E cut 1 set

B cut 2 sets

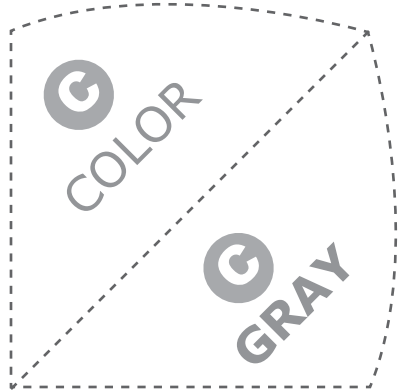

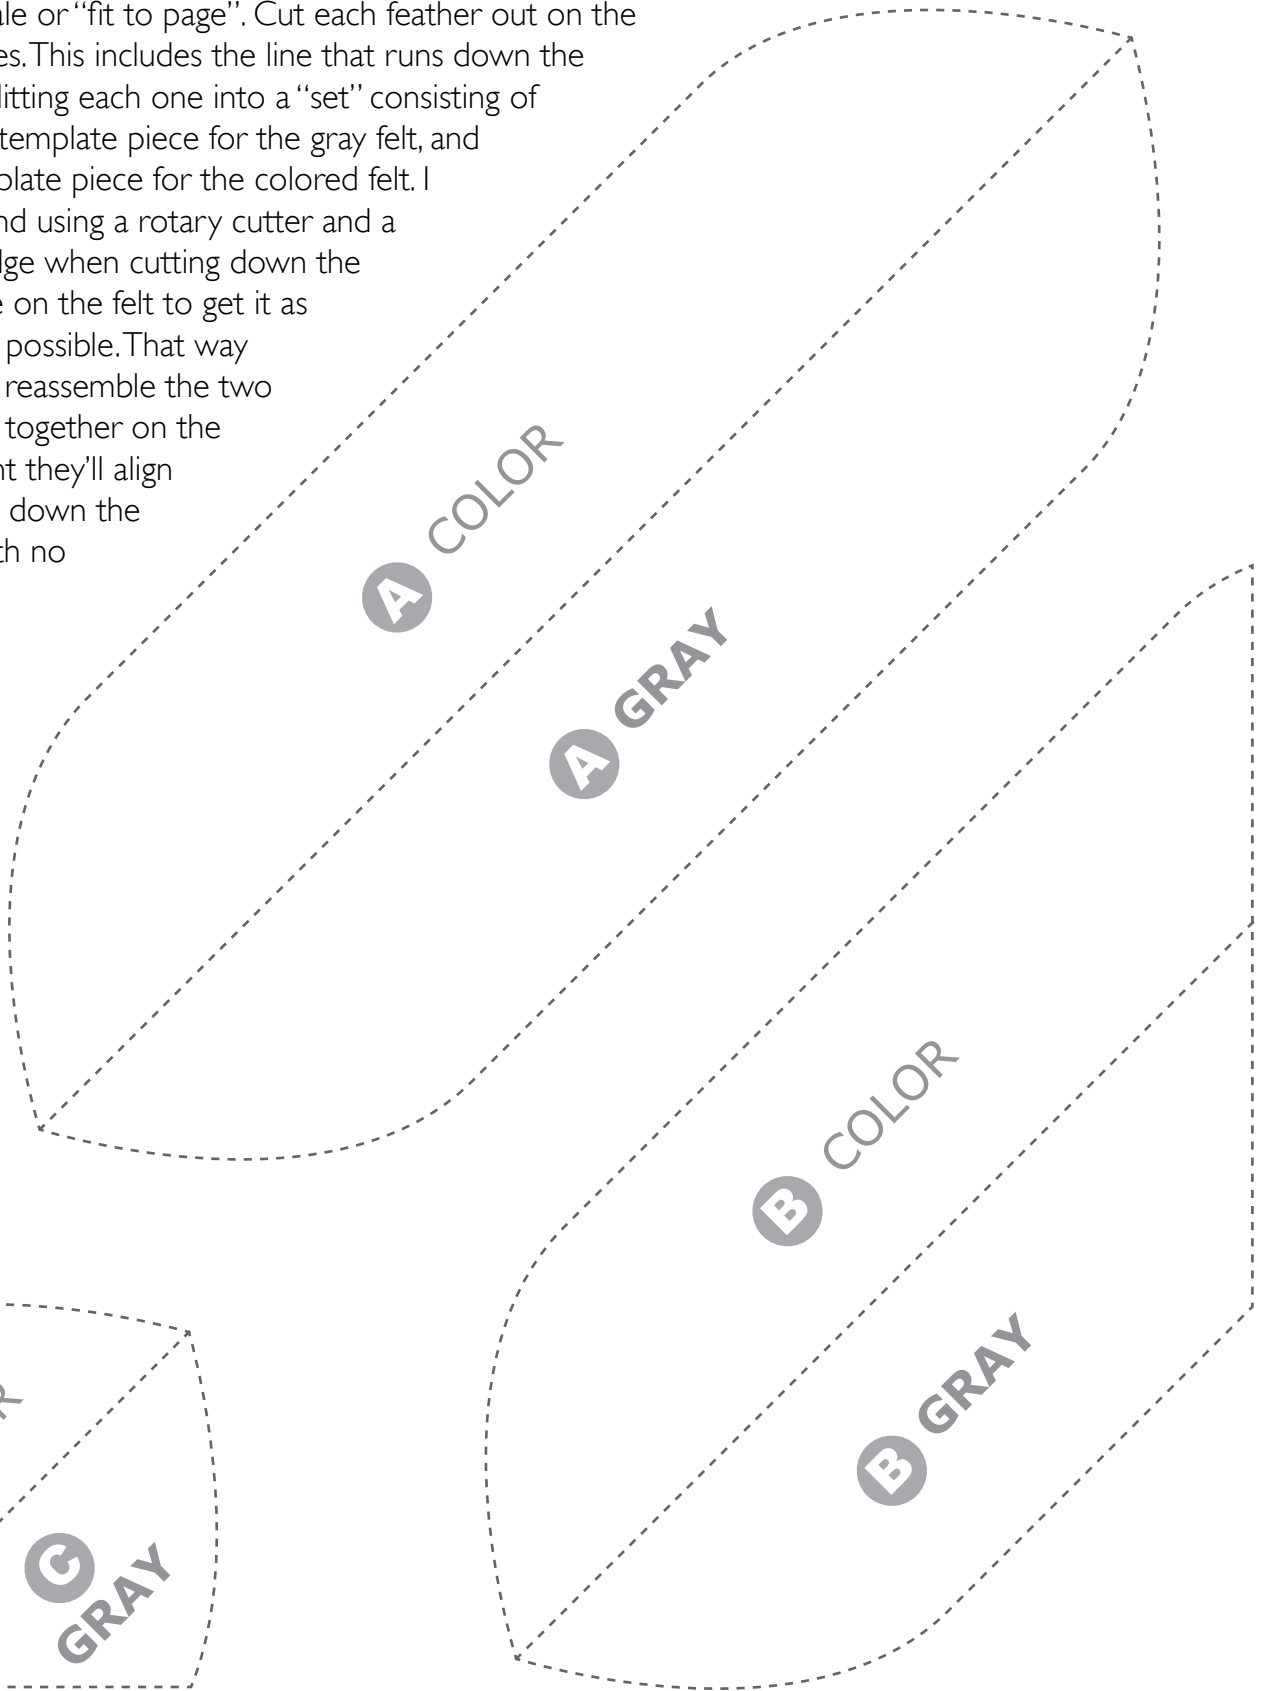

D cut 1 set

F cut 2 sets

Feather Templates A,B,C

This is the first page of template pieces for all the different feather variations on the pillow top, there are a total of 6 unique templates.

Print this page out at 100% on 8.5" x 11" paper, do not scale or "fit to page". Cut each feather out on the dotted lines. This includes the line that runs down the middle, splitting each one into a "set" consisting of a bottom template piece for the gray felt, and a top template piece for the colored felt. I recommend using a rotary cutter and a straight edge when cutting down the center line on the felt to get it as straight as possible. That way when you reassemble the two felt pieces together on the pillow front they'll align seamlessly down the middle with no gaps.

Feather Templates D,E,F

This is the second page of template pieces, follow the same instructions as on the first page.

* As always, feel free to print, share and/or distribute this to whomever you wish, **but this pattern is for personal use only, under no circumstances are you allowed to sell or profit from this free pattern.** If you post images or photos, please give credit. :)
